

A TOUGH ACT TO FOLLOW.

"The Working Man's Friend"

DAKOTA™

SAFE COMPANY

Dakota Safe Company introduces the Black Diamond Safe line, offering an economically priced safe that protects your valuables against theft and fire. Black Diamond Safes are constructed with solid **11 gauge steel** and manufactured with a **continuous welded body**, compared to safes that are spot welded at the seams. The Dakota BD Series have a **Roll Formed Door** with an **Extra Wide Stiffener Plate**, offering reinforcement against a pry attack. The door also contains 4 sided coverage of **1.5" locking bolts** with **3 sides active** that are strengthened by **anti-pry tabs** in the corners. The **exterior hinges** offer the convenience of a full 180° door opening.

Affordability does not mean you have to give up fire protection. The Black Diamond Series is a **1250°F 75 min. fire rated** safe. The doors also feature an **expanding heat seal**.

Additional features include: **Built in Door Organizer, Steel Shelf Supports, Gray Interior, Powder Coat Finish, Black Chrome Hardware, Heavy Duty 5 Spoke Handle, Slip Clutch and S&G Group 2 Lock.**
