

TOUGH ON FIRE, TOUGH ON THIEVES.

"The Working Man's Friend"

DAKOTATM

SAFE COMPANY

At Dakota Safe Company we know you work hard for your money and therefore expect quality when purchasing a product. We are proud to introduce an affordable high end gun safe built with the hard working man in mind. The DS Series is constructed with heavy **10 gauge steel** and manufactured with a **continuous welded body**, compared to safes that are spot welded at the seams. The Dakota DS Series doors are comprised of two full layers of **10 gauge steel** with a fire board in between, making them a **true composite door**. Our door contains **4 sided active 1.5" locking bolts** that are strengthened by **anti-pry tabs** in the corners. The **exterior hinges** offer the convenience of a full 180° door opening.

Not only are we tough on security but we take fire protection to the next level. Your valuables are protected with a **1250°F 1 hr. 45 min. fire rating**. The door also features an **expanding heat seal** and a **cold smoke seal**.

Additional Features include: **Built in Door Organizer, Steel Shelf Supports, Gray Interior, 3 Outlet Power Plug, 2 USB Power Ports, Ultra Bright Motion Activated LED Lighting System, Powder Coat Finish, Black Chrome Hardware, Decorative Hinge Caps, Heavy Duty 5 Spoke Handle, Slip Clutch, Key Locking S&G Dial, Heavy Duty Vault Style Pull Handle and Raised Floor to Protect Gun Stocks.**

Continuous Welded Body
